AMENDMENT

In response to the Office Action dated September 30, 1992,
please amend the application and consider the remarks as follows:

IN THE CLAIMS:

1. (twice amended) A locking female electrical receptor
comprising

a female receptor body having a pair of holes for receiving
the spaced prongs having punched holes of a male plug for
electrically connecting two electrical lines respectively coupled
to said receptor body and the male plug,

said receptor body having actuator means mounted for
selective relative movement within said receptor body,
